The readings broken down according to the access fee, for the different periods you have contracted, taken on 19/10/2025 are: peak: 1.272; flat: 1.316 kWh; Off-peak 679 kWh, these are actual readings. The break down on your consumption has been peak: 1 kWh; flat: 1 kWh; off-peak 1 kWh.

The maximum power ratings demanded in the last year have been 3,98 kW in P1 (peak) and 3,06 kW in P2 (off-peak).

The average electricity consumption for supplies in your same postcode for the period of this bill was 307,77 kWh.

The amount corresponding to network access fees in this bill, before tax, is €9,32, broken down as follows: Contracted power: €8,35, Energy: €0,12, Meter rental: €0,85. Applicable taxes: Electricity Tax and VAT or other indirect taxes. These amounts are included in the total bill amount (they do not constitute an extra cost).

Please address any complaints regarding the supply contract or billing to any of our Customer Service channels or Apartado de Correos 61090, 28080 Madrid. If your complaint has not been resolved, or more than 30 days have passed, you may contact the Consumer Arbitration Board for your Autonomous Region Comunitat Valenciana (contact phone 963866000). You may also contact the relevant organisations regarding Consumer rights and/or Energy for your Region.

Origen de electricidad 2024

Si bien la energía eléctrica que llega a nuestros hogares es indistinguible de la que consumen nuestros vecinos u otros consumidores conectados al mismo sistema eléctrico, es posible conocer el origen de la producción de energía eléctrica equivalente a la que consume en el hogar.

A estos efectos, se proporciona el desglose de la mezcla de tecnologías de producción nacional para así comparar los porcentajes del promedio nacional con los correspondientes a la energía vendida por su Compañía Comercializadora.

Iberdrola Clientes

Otras Nuclear Fuel/Gas CC Gas Natural Renovables Cogeneración de Alta Eficiencia Carbón

Origen	Iberdrola Clientes	Mix de generación nacional
Renovable	48,0%	56,5%
Cogen. Alta Eficiencia	2,2%	1,7%
CC Gas Natural	17,0%	14,2%
Carbón	5,1%	1,1%
Fuel/Gas	1,2%	1,1%
Nuclear	21,1%	20,2%
Otras no renovables	5,4%	5,2%

Impacto medioambiental

El impacto ambiental de su electricidad depende de las fuentes energéticas utilizadas para su generación.

En una escala de A a G donde A indica el mínimo impacto ambiental y G el máximo, y que el valor medio nacional corresponde al nivel D, la energía comercializada por Iberdrola tiene los siguientes valores.

Emisiones de CO₂
Iberdrola Clientes

Emisiones de CO₂ eq. (g/kWh) 154
Media nacional (g/kWh) 102

Residuos Radiactivos Alta Actividad
Iberdrola Clientes

Residuos Radiactivos (µg/kWh) 466
Media nacional (µg/kWh) 446

Más información sobre el origen de su electricidad en gdo.cnmc.es

De acuerdo con el sistema de Garantía de Origen e Información al Consumidor, implantado por la Comisión Nacional de la Energía, Iberdrola informa que toda la electricidad comercializada en 2024 ha sido etiquetada en la categoría D que indica un impacto ambiental igual a la media nacional.
